Medical gas devices

UNI AGSS 1L EN ISO 9170-2 socket

Product description

The socket is the final part of the compressed gas distribution system. The user can plug a probe into the socket to use the gas. The socket is gas-specific and various profiles are available depending on the gas being used so it is impossible to swap sockets and probes. The socket is EN ISO 9170-2 standard compliant. All materials are oxygen compatible, supplied clean and free of any traces of oil, grease or dust.
